-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Applicant's election without traverse of claims 12-25,30,31 in the reply filed on 4-27-06 is acknowledged. The traversal is on the ground(s) that none given. This is not found persuasive because na.

The requirement is still deemed proper and is therefore made FINAL.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 12-25,30 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Andrus(US 5753323) in view of Wilkinson(US 5727253). The primary reference to Andrus(US 5753323) teaches the basic claimed invention including a camouflage comprising a two-dimensional substrate having a color corresponding to a predominant ground color of a selected environment, first and second images simulating a synthetic respective and also corresponding to objects presented in a selected environment- fig 2; col 2, lines 33-67; col 3, lines 5-11. The primary reference fails to expressly teach its substrate extending in both nominally vertical and horizontal directions. The secondary reference to Wilkinson, however , expressly teaches these aspects in its patented full suited camouflage substrate— see fig 2. It would have been obvious to one of ordinary skill in the art at the time the invention is made to combine the teachings of the secondary reference to Andrus and have its substrate extends in

completely in both vertical and horizontal directions, in the absence of unexpected results motivated by the desire to better blend with the intended environment's objects and provide continuous images appearance when worn- col 2, line 17- 67. Concerning claims 13,15,17,18,20,21 and 23 the primary reference teaches the limitations in col 2, lines 21-47; col 3, lines 49- col 4, line 6. Concerning claims 14, 24,25,16 and 31, the primary reference teaches repeating , overlapping images on the substrate- claim 1.
